

ECON 11020-03: Introduction to Econometrics

Oscar Galvez-Soriano

Spring 2025

Instructor: Oscar Galvez-Soriano

E-mail: ogalvez@uchicago.edu

Personal [web page](#)

Office: SHFE 431

Class Room: SHFE 146

Class Hours: TuTh 8:00-09:20am

Office Hours: MonWed 08:30-9:30am

Discussion Section: Wed 5:30-6:20pm in SHFE 021

Teaching Assistant:

Gabriela Campos

E-mail: gabicampos@uchicago.edu

Office: Outside SHFE 146

Office Hours: Tu 4:00-6:00pm

Course Description

The objective of this course is to introduce students to the practice of econometrics. The course will focus on the use of multiple regression to describe/predict real world data and, under certain conditions, as a tool to establish causal relations. The course emphasizes all steps of the process of empirical research: data collection, analysis, and presentation (both written and oral). Multiple examples of this process will be discussed, and students will be expected to read and evaluate existing research. Students will apply the techniques discussed in class to a topic of their choosing. They will write a paper and present results to the class.

Required Materials

I have set up a Canvas course website that contains our textbook ("Piece of Cake" by Pablo Peña), lecture notes, problem sets, and other learning resources.

The following textbooks are not required, but serve as a complement for this class:

- Stock, James H. and Watson, Mark W. (2020). Introduction to Econometrics (Fourth Edition). Pearson.
- Gertler, Paul J., Martinez, Sebastian, Premand, Patrick, Rawlings, Laura B., Vermeersch, Christel M. J. (2016). Impact Evaluation in Practice (Second Edition). Washington, DC: Inter-American Development Bank and World Bank. <http://hdl.handle.net/10986/25030>

For further references, you may also review the following textbooks:

- Jeffrey M. Wooldridge (2015). Introductory Econometrics: A Modern Approach (Sixth Edition). Cengage Learning.
- Joshua D. Angrist and Jorn-Steffen Pischke (2009). Mostly Harmless Econometrics: An Empiricist's Companion. Princeton University Press.
- Joshua D. Angrist and Jorn-Steffen Pischke (2015). Mastering 'Metrics: The Path from Cause to Effect. Princeton University Press.

Prerequisites

In order to register for this course all students should have completed Econ 10000, Econ 10200, and either Econ 11010/21010 or STAT 22000/23400/24400/24410. Additionally, you must have a good command of high school Algebra, graphical analysis and, preferably, basic knowledge of Calculus. If you do not meet these prerequisites and you choose to take this course, then it is your responsibility to work on your math skills in order to be able to follow the materials taught in this course.

Requirements and Grading

Each student's cumulative score for this course will be based on performance on problem sets and exams, and the class paper with the weights given in the grading scheme below. This cumulative score will then be mapped into a letter grade at the end of the course.

1. Problem sets: four problem sets, with the lowest score dropped (15%)
2. Midterm exam. Tuesday, April 29 (35%)
3. Paper, due on Friday, May 23 (10%)
4. Final exam. Week of May 26 (40%)

All grades are final except for correcting obvious grading mistakes. For example, points are added up incorrectly, or obviously correct answers are mistakenly marked wrong. Please bring these to the teaching assistant's attention as soon as possible. For other cases, please discuss questions with the teaching assistant or me.

The following are guaranteed letter grade cutoffs. At the instructor's discretion, cutoffs may be lowered but will never be raised.

Letter Grade	A or A-	B+ or B	B- or C+	C or C-	D+ or D	F
Cum. Score	90	80	70	60	50	<50

Any student scoring higher than the cutoff given above will earn at least that grade in the course. You may request Pass/Fail grading no later than Monday, May 26 at 5PM CT. If you wish to withdraw from the course without a W on your transcript you must do so before Friday, April 11 at 5PM CT. A withdrawal after this date but before Monday, May 19 at 5PM will result in a W grade on your transcript. A withdrawal may not be granted after this time except in extenuating

circumstances, and you must submit a petition to withdraw with your academic advisor. You cannot switch back to a letter grade after withdrawing or opting for Pass/Fail, so you should discuss the ramifications with your academic advisor before requesting either.

Problem Sets: Problem sets will be assigned on Canvas and should be submitted the following week (on Gradescope) by the time of the discussion section (5:30 pm). Late submission will incur a penalty of 10 out of 100 points. Solutions to problem sets will be available right after the submission date and will be explained during the discussion section. Graded problem sets will be returned one week after submission. You should examine the solutions to review any areas of confusion or questions marked as incorrect. Regrade requests will be available only within two weeks after submission. Note I cannot give deadline extensions for the problem sets; however, I do drop the lowest problem set grade, which provides you with some flexibility in handling unexpected events. Assignments that require coding should include a printout of the code used to generate the necessary output to problem-set questions as part of the submission. Students must develop basic familiarity with Stata, which will be covered in class and discussion sections. Students may use **vLAB** to access university software. Off-Campus use requires **cVPN**.

Exams: Exams will draw on material from lectures, problem sets, and the textbook. You will have 60 minutes to complete the midterm and 80 minutes to complete the final exam. Both exams will take place in person. No book, notes, phone or internet access of any kind is allowed during the exam. Examinations are to be attempted individually. No communication with others about any aspect of the course is permitted during the exam. No part of the examinations may be copied, shared, posted on a website or otherwise distributed at any time. Any student who violates these examination policies will fail the course and be referred to the Dean of Students.

If you have a reasonable excuse to miss the midterm, you need permission from me before its scheduled time to miss it, otherwise, you will receive a zero for the midterm. If granted permission to miss it, your final exam score will substitute the score for your missed midterm. However, please note that the final is meant to be more challenging than the midterm. It is **impossible to take the final exam at a different day or time** than the one established by the University Registrar.

If you miss the final with an excuse that meets University standards you will receive an incomplete for the course and will be required to resolve it in the upcoming quarters in order to receive a letter grade. Please note that travel plans are not an approved excuse for missing an exam. If you make travel plans that conflict with the final for any reason other than a university approved excuse, you will receive a zero for the final.

Class Paper: Students will collaborate in groups of up to four to work on a project using data and a prompt I will provide later on in the course. Students will tackle a relevant economic question and should use methods developed during the course to answer this question and give a detailed explanation of their findings. Each group will give a 6-minute presentation of their results. This class paper is worth 10% of your grade.

Attendance: Students are expected to attend every lecture and actively participate in class activities. Lectures are the primary source of the material you are required to learn for this course. While the textbook can serve as a helpful supplement, it is not a substitute for attending lectures.

- Lecture slides will be provided, but they are designed to support—not replace—what is discussed in class. They do not contain all the explanations, examples, or insights necessary to succeed in the course.
- Lecture notes will not be recorded or distributed. You are responsible for attending class and taking your own notes based on the material presented and discussed.
- Missing class means missing critical information that will not be available elsewhere.

General Policies

Our Class Meetings

We will meet every Tuesday and Thursday between March 25th and May 22nd. Lectures will begin at 8:00 am and end at 9:20 am.

Academic Honesty

To cultivate an environment of academic integrity, the University of Chicago expects students to abide by the University's [Academic Honesty and Plagiarism Policy](#), found in the University of Chicago Student Manual.

Student Code of Conduct

Students are expected to abide by the University of Chicago's [Student Code of Conduct](#).

Sexual Misconduct Policy

In accordance with the University of Chicago's Policy on Harassment, Discrimination, and Sexual Misconduct, your instructor is a "responsible employee" for reporting purposes under Title IX regulations and state law and must report incidents of sexual misconduct (sexual harassment, non-consensual sexual contact, sexual assault, sexual exploitation, sexual intimidation, intimate partner violence, or stalking) about which they become aware to the Title IX office. Please know there are places on campus where you can make a report in confidence. More information can be found on the Title IX [website](#).

Special Accommodations and Accessibility

The University of Chicago is committed to ensuring equitable access to our academic programs and services. Students with disabilities who have been approved for the use of academic accommodations by Student Disability Services (SDS) and need a reasonable accommodations to participate fully in this course should follow the procedures established by SDS for using accommodations. Timely notifications are required in order to ensure that your accommodations can be implemented. Please meet with me to discuss your access needs in this class after you have completed the SDS procedures for requesting accommodations.

Phone: (773) 702-6000

Email: disabilities@uchicago.edu

For exam accommodations, it is recommended that students send their Instructor Notification Letters at the beginning of the quarter, or as soon as possible. Instructor Notification Letters must be sent no later than 7 days prior to the first quiz/exam date for the class for each class for which a student is seeking to use accommodations.

We will request that SDS proctor the Econ 102 exams. Students must submit an exam request/schedule through the SDS Portal at least 7 days prior to an exam date. These steps should be followed for each exam. One option that students may utilize is submitting the exam requests for all known exam dates early in the quarter and may be done in one sitting if the dates are available in the syllabi. Currently, SDS may be unable to make arrangements for exam requests submitted less than 7 days in advance of an exam date. Remote Exams are not available.

To submit an exam request, students should complete the following steps after they have sent their Instructor Notification Letter:

1. Log in to the AIM Student Portal (<https://rainier.accessiblelearning.com/UChicago>)
2. Select "Alternative Testing" on the left-hand side of the page.
3. Select the course for which you are scheduling with SDS from the drop-down menu at the top of the page.
4. Click "Schedule an Exam".
5. Complete the required fields on the exam detail form.
6. Click "Add Exam Request".
7. Students will receive a confirmation e-mail to verify that their exam request was received and may check the status of their request in their AIM Student Portal. SDS may proctor in-person exams at locations across campus and the locations will be listed in the status update in AIM. Locations are determined by SDS and may include Ida Noyes Hall, David Rubenstein Forum, and other campus locations.

Diversity and Inclusion

The University of Chicago believes that a culture of rigorous inquiry demands an environment where diverse perspectives, experiences, individuals, and ideas inform intellectual exchange and engagement. I concur with that commitment and expect to maintain a productive learning environment based upon open communication, mutual respect, and nondiscrimination. The University does not discriminate on the basis of race, color, religion, sex, sexual orientation, gender identity, national or ethnic origin, age, status as an individual with a disability, protected veteran status, genetic information, or other protected classes as required by law.

Use of AI Tools

In this course, we will be developing skills and knowledge that are important to discover and practice on your own. Because use of AI tools inhibits development of these skills and knowledge, students are not allowed to use any AI tools, such as ChatGPT, DeepSeek or Dall E 2, in this course. Students are expected to present work that is their own without assistance from others, including automated tools. If you are unclear if something is an AI tool, please check with your instructor. Using AI tools for any purposes in this course will violate the University's [academic integrity policy](#).

Syllabus Changes

Notice that I may need to adjust the syllabus, depending on our progress in the course. In such case, I will notify you about these changes during the lectures and through our Canvas website.

Course Outline and Schedule

The following schedule is tentative and subject to minor changes.

Week	Date	Lecture	Topics	Textbook pages	PS/Paper due
1	3/25	1	Introduction; Statistics Review	1-4	
	3/27	2	Simple Linear Regression	5-6	
2	4/1	3	OLS and Multivariate Regression	7-9	
	4/3	4	Assumptions, Properties and Inference	10-11	
3	4/8	5	Normality and Statistical Inference	11-12, 24-37	PS1 (4/9)
	4/10	6	Inference, Interpretation and Specification	37-41	
4	4/15	7	Specification and Hypothesis Testing	13-23	PS2 (4/16)
	4/17	8	Specification Issues	42-53	
5	4/22	9	RCTs	54-59, 66-70	PS3 (4/23)
	4/24	10	Panel Data; Fixed Effects		
6	4/29		Midterm		
	5/1	11	Difference in Differences (DiD)	74-79	
7	5/6	12	Parallel Trends Assumption (PTA)		
	5/8	13	Instrumental Variables (IV)		
8	5/13	14	Regression Discontinuity Design (RDD)	70-73	PS4 (5/14)
	5/15	15	Research Workshop		
9	5/20	16	Presentations		
	5/22	17	Presentations		Paper (5/23)
11	5/?	Final	Final Exam - Week of May 26
